SimplexGrinnell is pleased to offer for your consideration this quotation for the above project.

### Comments

\*\*\* SimplexGrinnell offers competitive financing options for qualified projects; Contact me for more Information. \*\*\*

SimplexGrinnell is pleased to present this proposal and looks forward to working with you. Below is a brief description of the work to be performed. Feel free to call should you have any questions.

**Total Net Selling Price: \$15,301.00**

This proposal is for the service replacement of the 4020 Fire Alarm Control Panel.  
This panel is being replaced due to a ground being within the panel hardware. Due to this panel being discontinued it is recommended that the panel be replaced with the latest upgrade.  
The panel will be replaced with a 4100ES Fire Alarm Control Panel.  
The existing panel will be removed and the new panel will be installed in the same location.  
The existing wire and devices will be utilized and terminated to the new panel.  
The older 4009 NAC that is next to the panel will be removed and the circuits will be moved to the new panel where the necessary power supplies will be provided. The newer 4009 NAC panels will be connected to the IDNet circuit and will be programmed accordingly.  
There will also be a conduit installed for the fiber patch cable that is currently hanging out of the ceiling.  
There will also be a surge suppressor installed on the 120vac in order to provide extra protection.

This panel will be connected back to the network and tested to make sure that all necessary points are passed to the main panel.

Upon completion of the installation there will be a functionality test performed in order to insure the proper operation of the new panel.

## SimplexGrinnell Quotation

Comments (continued)

This proposal includes the listed equipment, the removal old panel and the installation of the new panel, functionality test of the new panel, AHJ test (if required), and all close out documentation.

**The customer will be responsible for the notification of all occupants during the installation of equipment and testing and any fire watch that may be required.**

**The pricing is subject to change upon the approval of the submittals to the local AHJ; which have the Authority to make changes as needed to the system layout.**

**The wire/devices will be reused with the exception of any wire/devices that may be defective in the field; which if it is determined that there are some wire/devices that are defective, a new quote will be issued for any additional repairs.**

\*\*\*APPLICABLE TAXES ARE NOT LISTED AND MUST BE ADDED. \*\*\*

THIS QUOTATION INCLUDES ONLY THOSE ITEMS LISTED BELOW:

Equipment as listed  
Freight  
Panel terminations  
Technical support including programming  
Functional system certification test  
AHJ test  
Close out documentation  
One year standard warranty from substantial completion

THIS QUOTATION DOES NOT INCLUDE THE FOLLOWING:

120vac power at the location of our panel  
Payment/Performance Bonds
